

AMENDMENTS TO THE SPECIFICATION

Please amend Paragraph [0026] of the specification to read as follows:

[0026] Magnetic mixer 18 is mounted on dolly 14. Magnetic mixer 18 is a standard off-the-shelf item that uses a magnetic force to rotate a magnetic stir rod which will be discussed below in greater detail. One example of magnetic mixer 18 comprises the ~~Maxistirrer~~ MAXISTIRRER Model #S25530 240V available from Barnstead/ Thermolyne out of Dubuque, Iowa. Magnetic mixer 18 has a top surface 60 and a front face 62. Switches 64 are positioned on front face 62 and are used for turning magnetic mixer 18 on and off and for adjusting the speed at which magnetic mixer 18 rotates a magnetic stir bar.

Please amend Paragraph [0041] of the specification to read as follows:

[0041] As with ports 112 and 114, during assembly a hole 103 is formed in bottom panel 101 (Figure 5A). Mixing dish 120 is seated within the hole 103 so that outer perimeter flange 124 rests against bottom panel 101. Again, conventional welding or other sealing techniques are then used to seal perimeter flange 124 to bottom panel 101.
